

13 July 1973

MEMORANDUM FOR:

25X1

SUBJECT: Development of DIA's Intelligence  
Management Information System (IMIS)

1. As a normal operating guideline, I would expect you to maintain regular and technical liaison with all elements of the community, developing or improving data of use to the Program Management and/or DCI role. The recommendation of your paper is approved. What specific arrangements do you have in mind? Will you need some extra help?

2. The Sprague Study has been ongoing and I encourage your cooperation with the interface issues.

3. If you can define now how the matter before the CIA Management Committee may be altered or influenced by the IMIS evolution (para. 14), please provide these to me ASAP so that we can fully advise and support General Allen in presenting the issue when it comes up on the Agenda. (I understand CIA will have arguments that only the data belonging to individual agencies should be made available on request rather than community data profiles. Conceivably the interface with IMIS will shed further light on this.)

4. I will report your paper to Allen, but action in para. 1 is approved.

25X1
